# **findMarcRecordsInOLE Documentation**

*Release 1.0.0*

**Tyler Danstrom**

**May 16, 2018**

---

## Contents

---

**1 Indices and tables**

**3**

This is a command-line tool intended to enable developers at UChicago library to search for MARC records in OLE and get back the up-to-date full records matching their query.

After installation, you can run the CLI application by typing

```
find_records -h
```

```
usage: find_records [-h] [--version] {show_lookups,searching} ...
```

**positional arguments:** {show\_lookups,searching} how to retrieve valid lookup labels

**optional arguments:**

|                   |  |
|-------------------|--|
| <b>-h, --help</b> | show this help message and exit        |
| <b>--version</b>  | show program's version number and exit |
